## PROFILE

QA Engineer with over 4 years of experience in testing microservice web applications and complex backend systems.
Specializing in API, databases (SQL), and integration testing.
Automating UI, API, and DB tests with Python and Playwright, covering full E2E testing.
Independently implemented TMS Qase into workflow, migrating the entire department from Google Docs and centralizing test documentation.
Single-handedly ensured the quality of a major release (8 user stories), allowing zero defects into production.

## SKILLS

Testing: Manual, Auto, API, Backend, Regression, Integration, E2E
Tools: Postman, Bruno, Swagger, Chrome DevTools, Git, GitLab CI, Android Studio, Xcode, Grafana, Headlamp, Minio, Kibana/Opensearch, Python, Playwright, Requests, Psycopg
Databases: SQL (PostgreSQL, MySQL), DBeaver
Architecture: Microservices, REST API, RabbitMQ
TMS/Trackers and documentation: Qase, Doqa, Jira, YouTrack, Confluence, Affine

## EXPERIENCE

**Web-studio Regul, LLC**
*Development of an AI platform with a complex billing system with 60+ models integrations*

**QA Engineer** (01/2025 – Present)
- Ensure the quality of an AI platform release (8+ user stories), which included changes in microservices, DB migrations, and new billing logic; as a result, zero critical defects reached production.
- Took ownership of testing complex billing logic for AI services, including token-based pricing verification and event processing via RabbitMQ, preventing potential financial errors.
- Acted as L3 Support: independently localized incidents by analyzing logs, databases, and business processes, and prepared root cause analysis (RCA) reports.
- Mentored and onboarded new QA engineers, helping them integrate into the project faster and start delivering value to the team.

**Career break** (09/2024 – 12/2024)
*Relocation to Serbia, settling in, and professional development*

**101 Internet**
*Large aggregator and marketplace for internet service providers*

**QA Engineer** (10/2023 – 08/2024)
- Initiated and independently implemented TMS Qase, migrating all of the department's test documentation from Google Docs. This centralized test cases and accelerated regression testing preparation.
- Conducted manual testing (regression, e2e, smoke) for a web application with microservice architecture, working in tandem with the development team to ensure release quality.
- Tested API using Postman and GraphQL Network, verifying integration between services and data processing correctness.

**base86**
*B2B marketplace for dental clinics in the USA*

**QA Engineer** (04/2023 – 10/2023)
- Identified and documented over 20 critical defects, which prevented a release failure and ensured platform stability for B2B clients.
- Conducted onboarding and mentored 5 QA interns, helping them master testing processes and tools (Qase, Jira), which accelerated team growth.

**Hansa**
*Major European home appliance manufacturer*

**Software Tester** (10/2021 – 07/2022)
- Tested the key integration between the new online store and the warehouse system (CMS <> ERP), identifying and resolving 5+ blockers related to incorrect stock and price synchronization.
- Conducted exploratory UI/UX testing, resulting in 60+ bug reports and improvement suggestions, which were accepted by the team to enhance website usability.

## EDUCATION

**GITR FILM & TELEVISION SCHOOL (RU)**
Incomplete (2007 – 2010)
Faculty of Television and Radio Broadcasting, International Correspondent

**Edge Hill University (UK)**
Film and Video Summer Programme (2008)
UK Department for Media

## COURSES AND QUALIFICATIONS

**Mentorpiece**
Pre-Middle QA: Manual Testing (02/2023 – 08/2023)

**QA Studio**
Test Automation with Python + Playwright (04/2026 – 08/2026)
