PROFILE

QA Engineer with 4+ years of experience testing microservice web applications and complex backend systems: billing, payments, integrations.
Specializing in API, database (SQL), and integration testing, plus requirements analysis and test design for business-critical logic.
Automating UI, API, and DB tests with Python and Playwright, covering full E2E scenarios (projects on GitHub).
Own testing of billing and payment services since launch: 12+ months in production with zero critical defects.
Implemented TMS Qase for a QA department: migrated 400+ test cases from Google Docs and wrote ~300 new ones.

SKILLS

Testing: API, Backend, Integration, E2E, Regression, Smoke, Exploratory, Mobile (iOS, Android), Desktop (macOS)
Test design & analysis: Boundary Value Analysis, Equivalence Partitioning, State Transition, Requirements Analysis, Root Cause Analysis (RCA)
Automation: Python, pytest, Playwright, Requests, Psycopg
API, debugging & mobile: Postman, Bruno, Swagger, GraphQL Network, Chrome DevTools, Android Studio, Xcode
Infrastructure & monitoring: Kubernetes (Headlamp), MinIO (S3), Grafana, Kibana/OpenSearch, Git, GitLab CI
Databases: SQL (PostgreSQL, MySQL), DBeaver
Architecture: Microservices, REST API, GraphQL, RabbitMQ
TMS, trackers & docs: Qase, Doqa, Jira, YouTrack, Confluence, AFFiNE

EXPERIENCE

Web-studio Regul
Development of AI products (incl. AlpinaGPT) with a complex billing system and 60+ model integrations

QA Engineer (01/2025 – Present)
- Own end-to-end testing of the billing and payment services since their launch: 12+ months in production with zero critical defects.
- Test 24 more microservices in parallel, from auth and identity to chat and image generation, prioritizing checks by business risk.
- Verify token-based pricing for 60+ AI models, including per-token rates with many decimal places, currency-rate sync for B2B balance top-ups, and idempotent event processing via RabbitMQ, preventing financial discrepancies.
- Test the AlpinaGPT web, mobile (iOS, Android), and desktop (macOS) apps; wrote Python + Playwright autotests covering authorization and part of the admin panel.
- Act as L3 support: localize production incidents through logs (Grafana), databases, and business processes, and prepare RCA reports.
- Onboard and mentor new QA engineers (3 to date), helping them start delivering value to the team faster.

Career break (09/2024 – 12/2024)
Relocation to Serbia, settling in, and professional development

101 Internet
Large aggregator and marketplace for internet service providers

QA Engineer (10/2023 – 08/2024)
- Initiated and implemented TMS Qase for the QA department: migrated 400+ test cases from Google Docs, wrote ~300 new ones, and kept the entire base up to date. This centralized test documentation and accelerated regression preparation.
- Conducted manual testing (regression, E2E, smoke) of a web application with microservice architecture, working in tandem with the development team to ensure release quality.
- Tested API using Postman and GraphQL Network, verifying integration between services and data processing correctness.

base86
B2B marketplace for dental clinics in the USA

QA Engineer (04/2023 – 10/2023)
- Identified and documented over 20 critical defects, which prevented a release failure and ensured platform stability for B2B clients.
- Conducted onboarding and mentored 5 QA interns, helping them master testing processes and tools (Qase, Jira), which accelerated team growth.

Career break (08/2022 – 03/2023)
Relocation to Georgia; systematized hands-on testing experience with theory and started the Mentorpiece Pre-Middle QA course to move up to the Middle level

Hansa
Major European home appliance manufacturer

Software Tester (10/2021 – 07/2022)

- Tested the key integration between the new online store and the warehouse system (CMS <> ERP), identifying 5+ blockers related to incorrect stock and price synchronization and driving them to resolution.
- Conducted exploratory UI/UX testing, resulting in 60+ bug reports and improvement suggestions, which were accepted by the team to enhance website usability.

EDUCATION

GITR FILM & TELEVISION SCHOOL (RU)
Incomplete (2007 – 2010)
Faculty of Television and Radio Broadcasting, International Correspondent

Edge Hill University (UK)
Film and Video Summer Programme (2008)
UK Department for Media

COURSES

Mentorpiece
Pre-Middle QA: Manual Testing (02/2023 – 08/2023)

QA Studio
Test Automation with Python + Playwright (04/2026 – 08/2026)

LANGUAGES

- English – C1
- Russian – Native
